

SDCA Press Kit Information

Our Vision:

Creating enhanced communities through equal access to cross-disciplinary sustainable design solutions.

Mission:

To provide a means for pooling talent, sharing ideas, and developing programs for the betterment of the community through integrative solutions for the built environment.

Who we Are:

We are a non-profit volunteer driven organization with our members representing diverse building community organizations. Each member is a sustainable-minded professional. We are connected by our desire to provide professional design services to the 99% of the human race that does not normally have the opportunity to fund these types of services. We began in 2010 and generally complete one pro-bono project each year. Each of our organizations are represented at the annual Red and Green Scene Holiday Fundraising event. Currently, this event provides the basis for our funding.

What we Do:

Our cross-disciplinary approach focuses on providing our partners, whose missions focus on sustainability and community-enhancement, with a completed integrated design solution.
